

## When Opportunity Comes A Knockin'

It is with great pleasure and pride that we at BrightView Capital Management have completed our eighth year of algorithm development and use, and our second year of external investment management. Over these two years we have provided our investment partners:

- A return 18% higher than the S&P 500;
- Have taken only half the market's risk; and
- Have averaged a new all-time portfolio high every 6 trading days

We invest in liquid blue chip stocks using a systematic, disciplined and repeatable trend-following approach, but in a differentiated way that provides us with substantial advantages. Our boutique size allows us to use a more nimble approach targeting inefficiencies that large institutions cannot. With a focus on just the shared wealth building goals of our close knit group of partners, we can pursue the types of high-conviction positions that have the potential to provide high rates of return, even in a bull, bear or flat market.

We offer a clearly differentiated investment opportunity as there are only a very limited number of firms doing the kind of research-intensive algorithmic work that we do that also makes it available to the non-institutional investor. Our partners can participate with us using an existing brokerage account, 401k, IRA or with new capital. Contact us today at [InvestorRelations@BrightViewCM.com](mailto:InvestorRelations@BrightViewCM.com).
