Disclaimer

Delivery of this presentation to anyone other than the person intended as the recipient is unauthorized. Any reproduction or circulation of it, in whole or part, is prohibited.

This is not an offer or the solicitation of an offer to purchase an interest in the BrightView Adaptive Fund LP ("Fund"). Any such offer or solicitation will only be made to qualified investors following the delivery of a confidential private placement memorandum and only in those jurisdictions where permitted by law.

All investments, including an investment in the Fund, involve risk. No assurance can be given that the investment objectives will be achieved or that an investor will receive a return of all, or part, of his or her investment. Investment results may vary substantially over any given time period. The strategy involves the potential risk of loss as well as the potential for profit.

The investment manager utilizes a trading system that is based on one its team has used since the mid 1990s. Backtested investment results are simulated results from the application of the investment manager's investment model with the benefit of historical observation. Backtested analysis was done using S&P 100 stocks covering the period from June 1995 to December 2015. Since 2012, live historical trading using various evolutions of the investment manager's algorithms has also taken place. The Fund began official trading operation in January 2015. Backtested and historical performance are not necessarily indicative of the future performance of the Fund.

INVESTING REIMAGINED

INVESTING REIMAGINED

The BrightView Adaptive Strategy 1996 - 2016

Has grown consistently even during bear markets; and has done far better than the S&P 500.

The equity curve looks similar from the beginning but because of the scale, its increase is not discernable.
